HIGHER PRICES TO AID FARMER

Wheat and Corn Crops Fair
In Some Districts.

SURVEY OF SITUATION IN OHIO

Increase of Prices Results in Feeling of Confidence Among Farmers, the Government Statistician Says. Oats in Uniformly Good Condition Over the State—Good Crop of Hay Reported.

Columbus, Aug. 4.—In a survey of the agricultural situation, C. J. West, state-federal crop statistician, declares that Ohio farmers will benefit considerably from increased grain and hog prices, but they will not find themselves in anything like the situation of agriculturalists of Kansas and some other states, where bumper crops and a rising market are expected to offset the losses of several unfavorable years.

The higher range of prices is said to have resulted in a better moral situation and a feeling of confidence among farmers, and may be the forerunner of a general leveling out of values as between agricultural and manufactured products.

The sharp rise in the market prices for wheat, corn and hogs represents proportionately increased returns for those who have these products to sell, but production has been only sporadically good, and, therefore, financial benefits will be extremely scattered, strongly felt in some sections and scarcely noticeable in others, depending entirely upon crop conditions, West says. The only grain crop which is uniformly good over the state is oats, West declares, and oats in Ohio comprise only a minute portion of the cereal production.

Wheat, while good in northwestern Ohio, particularly in Auglaize, Union, Mercer and Van Wert counties, is in much less favorable condition in the northern and northeastern sections, and extremely poor in the central and southern portions of the state, West's statistics show.

"There may be some increase in the money value of the present wheat crop over that of a year ago," West declares, "but there is little doubt that this increase will be less than 25 per cent and probably about 10 per cent. Some farmers in central and southern Ohio, particularly around Washington, C. H., have found their wheat so poor that they are not cutting it, believing themselves better off financially if they leave it in the field. This offsets somewhat the general benefits of good crops in other parts of the state."

Corn Yield in Ohio.
The corn yield will be good only in scattered districts with some good fields, but much very poor acreage, West says his statistics show. In western Ohio and some parts of the southern section the prospects are fair, he declares, but even in these districts an early frost would do very great damage because of the lateness in planting. In other portions of the state the corn yield will be extremely poor, not only in quantity, but also in quality, West says. The situation apparently has not changed since he made his prediction that the 1924 Ohio corn crop probably would be the poorest in 20 years, he declares, adding that "the best we can hope for is a two-thirds crop."

A reflection of the shortage of corn in the price of hogs, as predicted by some authorities, may be a possibility, West concedes. "If farmers rush their hogs to market because they have no corn with which to fatten them, there is some danger of a reduction in hog prices," he admits. "However, the production of pork in the state probably will be only about 80 per cent of that of a year ago and this may militate against any sharp reduction in prices."

The good crop of hay which has resulted from extremely favorable weather conditions will be of financial benefit in some sections, West believes. Dairy and other farm products, however, have not participated in the activities of the rising market.

Columbus, Aug. 4.—Vernon M. Riegel, state director of education, asked State Auditor Tracy to transfer \$127,300 from the educational relief fund to the city of Lorain. The money was set aside by the director several weeks ago to aid Lorain in opening its schools in September. The city board of education ran short of funds last year, and was forced to borrow in anticipation of funds to be received for this year.

MRS. HARLAN J. STONE

Wife of Attorney General
of the United States.

INCREASE NOTED

Interest Collected on State Money For
Quarter Ended July 31.

Columbus, Aug. 4.—State Treasurer Day collected \$269,204.13 for the quarter ending July 31 from 400 banks throughout Ohio, which are known as inactive depositories, as interest on state money deposits. This is several thousand dollars more than was collected during the preceding quarter ending April 30, at which time the collections amounted to \$265,661.90. In addition to this sum coming from the inactive banks, approximately \$50,000 will be collected from the Columbus banks, where the active accounts are kept. The rates continue to remain high despite these days of cheap money, due to the fact that they were made for a two-year period by the banks themselves at the competitive bidding held in March, 1923.

Loyalty to Coolidge the Test.
Bellefontaine, O., Aug. 4.—The Republican central and executive committee of Logan county meeting here decided that voters who have talked against President Coolidge will not be permitted to vote in the Republican primary here on Aug. 12. Allegiance to the president is to be made the test of a vote in the Republican primary.

BIG INCREASE IN CRIME SEEN

Ohio's Prison Population Doubled
Within Ten Years.

CLEMENCY BOARD'S REPORT

Automobile Thefts Swelling the Population of Penal Institutions by the Hundreds—Recommendations Made for Clemency in 73 Cases During the Last Fiscal Year—Synopsis of the Report.

Columbus, Aug. 4.—Crime has increased enormously within the past 10 years and the combined population of the three major penal institutions in Ohio has substantially doubled within that time.

This is revealed in the report of the state board of clemency for the fiscal year ending July 1.

Auto theft swells the population of penal institutions by hundreds now. It furnishes the means of getaway in robbery and adds to that of other forms of crime, the report says, and continues: "Then there is the psychology of war. For years we were reading of human slaughter and thinking in terms of bloodshed, violence and arms. Human life was cheapened in the eyes of the susceptible immature. Even prohibition is not an unmixed blessing. Now we have 125 violators of prohibition statutes in the penitentiary—two years ago we had none. The late enormous trek of southern colored men has had its menace. It is reflected in the population of the Ohio penitentiary."

Recommendation for executive clemency has been made by the board in 73 cases during the fiscal year, and, with one exception, Governor Donahy followed the recommendation of the board. Each one of the pardoned men is "going straight," and not one has been either reported for violation of his parole or been returned, the report says.

Defending its action in recommending executive clemency to Governor Donahy in so many cases, the board says: "This board has recommended to Governor Donahy during the past year 37 pardon and commutation cases. Save one, executive clemency has followed in every case. This may seem like a large number of pardons. It is. But it should also be remembered, in this connection, that the population of the Ohio penitentiary on June 30, 1924, the end of the fiscal year, was 2,877, almost twice the number 10 years ago.

The number of hearings for parole during the past year was 2,395, as compared with 4,398 during the previous year. This reduction, the report declares, was by reason of the Norwood law. No fees are charged or accepted in behalf of prisoners and the law directs that an attorney or other person shall appear before the board of clemency in behalf of any prisoner seeking his freedom.

The parole honor system is defended by the board, and strong praise is given Warden Thomas for his help in this matter. The men are tested in various degrees by the warden and the test of the honor roll qualifies the prisoners for places on the monthly parole docket.

During the past year paroles were granted to 241 inmates of the penitentiary, conditioned that they leave Ohio, and to 158 inmates of the Mansfield reformatory, and 25 of the women's reformatory at Marysville, on the same condition, making a total of 424. None of these was born in Ohio. The number of parole violators returned during the year was 255, of whom only 57 were paroled by the present board. Out of more than 500 applications for pardons and commutation of sentence during the year, more than 428 were rejected.

HERE AND THERE

United Verde Copper company last month broke all production records at its properties at Jerome, Ariz., mining between 9,500,000 and 10,000,000 pounds of the red metal.

Claude N. Watters, former cashier of the Indian Refining company, was arrested in New York on an indictment charging him with embezzling \$120,000 of the company's funds.

In order to relieve the destitute situation of Jews, the central executive committee of white Russia has decided to apportion free land and homesteads to several hundred thousand laboring people, 75 per cent of whom are without employment.

Newell D. Gilbert, 76, professor of physiology at the Illinois state normal college at DeKalb, died suddenly of heart disease at his summer home at Bass Lake, Mich.

CROWN PRINCE OF UGANDA

Now Living and Working
in the City of Atlanta, Ga.

DOINGS IN OHIO

Boy Starts Fire.

Findlay, O., Aug. 4.—A Cleveland boy of 10 visiting relatives here set fire to five barns within five hours to see the fire trucks in operation. The boy told officers he was not getting enough thrills out of his sojourn here and started the fires to relieve the monotony. The total loss amounted to about \$400, which his relatives agreed to make good. The boy was released after receiving a severe lecture.

Curtis Seeks New Trial.

Canton, O., Aug. 4.—A motion for a new trial on 23 different grounds was filed in common pleas court on behalf of E. E. Curtis, former safety director, found guilty on a charge of accepting a bribe. Alleged error on the part of the court and misconduct on the part of the prosecuting attorney are cited as grounds for the motion.

Lorain Relief Fund.

Cleveland, Aug. 4.—The Lorain relief fund was swelled to \$423,309.41 when an additional \$12,684.41 was turned over to D. C. Willis, treasurer. Included in the day's receipts was \$10,000 from Columbus, \$500 from the Polish National Alliance of the United States, \$235 from Lima and \$100 from St. Louis.

Safe Cracked.

Cincinnati, Aug. 4.—After seizing and binding Riley Carrier, night watchman at the Ohio Refining company here, three masked men broke into the company's office, knocked the combination from the safe and escaped with \$75 in cash, \$15 in stamps and checks worth between \$400 and \$500.

Stock Dealer Loses Life.

Newark, O., Aug. 4.—Charles Keller, 63, was almost instantly killed while unloading hay from a wagon to the mow. A large hay fork struck him on the head, causing him to fall, breaking his neck. Keller was nationally prominent as a stock raiser and dealer.

Two Boys Drown.

Uhrichsville, O., Aug. 4.—Edward and Clarence Pedrotty, aged 10 and 6, were drowned in a reservoir near this city. Clarence had crawled down a slippery incline to get a drink. He fell in and his brother, Edward, was drowned trying to save him.

Fatal Crash.

Dayton, O., Aug. 4.—Patrick Rooney, 47, was killed in a collision between a motorcycle and an automobile here. James McKeag, 35, and Andrew Phister, 63, were badly hurt. The accident occurred on a narrow bridge.

Shot in the Head.

Springfield, O., Aug. 4.—Morris Leffel, 55, farmer of Christiansburg, was found dead at his home with a gunshot wound in his head. The coroner believes it a case of suicide.

B. & L. Promoter Dead.

Cincinnati, Aug. 4.—Herman H. Evers, 74, early promoter of building and loan associations in Cincinnati, is dead at his home here, following a lingering illness.

Killed in a Gang Fight.

Toledo, Aug. 4.—Michael Slewinski, 26, was beaten to death in a gang fight outside a soda drink place here. The police made several arrests.

Yoeman Trial Date Set.

Mt. Gilead, O., Aug. 4.—Mrs. Annora Yoeman, 39, entered a plea of not guilty when arraigned in Judge D. H. Wood's common pleas court here on a charge of first degree murder in connection with the death of her husband, Louis Yoeman, June 28. Judge Wood ordered her returned to jail to await trial on Sept. 2.

SECOND FLYER IN ICELAND

Lieutenant Smith Successfully
Negotiates Trip.

COMPANION IS FORCED DOWN

Lieutenant Wade, Who Was Blocked by Fog on Saturday, Is Compelled to Descend on His Second Trip Because of Engine Trouble—Expects to Join the Other American Flyers When Repairs Are Made.

London, Aug. 4.—Lieutenant Lowell H. Smith, who took off from Kirkwall in the Orkneys, landed safely at Hoenf Hornafjord, Iceland, after a 500 mile flight. Smith joined Lieutenant Erick Nelson, the first American around-the-world flyer to negotiate the flight from Kirkwall to Iceland, which was accomplished Saturday. Lieutenant Leigh Wade also started with Smith from Kirkwall, but engine trouble forced him down when about 250 miles off the Scottish coast. His plane was taken in tow by a trawler and it is expected that when repairs are affected he will proceed to Hoenf Hornafjord.

Lieutenant Smith encountered both fog and rain squalls during the flight from Kirkwall to Iceland. Both Smith and Wade, who took off with Nelson Saturday, were forced by the heavy fog to return after covering about 30 miles of the trip. Lieutenant Nelson pushed through a clear hole in the fog from an altitude of 3,000 feet to a clear level again. This was the second time the fliers became separated since they lost their leader, Major Frederick L. Martin, in Alaska in the early stages of the flight. The other occasion was in the difficult passage over the China sea.

Lieutenant Wade, giving a description of this second trip, said that as soon as the planes hit the thick center of the fog they got close together. For a time a distance of only about 50 feet separated them, he said. They signaled each other compass readings, drifts and other bearings. Smith hesitated to turn aside after once making the getaway, but it soon became apparent that to combat the fog, which covered hundreds of miles of the ocean, would be useless, and they decided to return.

SENATOR STANLEY WINS NOMINATION

Congressman Langley Also
Named to Succeed Himself.

Frankfort, Ky., Aug. 4.—Primary returns show that Senator A. O. Stanley, Democrat, won the nomination for senator over his opponent, John Junior Howe.

Fred M. Sackett of Louisville won the Republican nomination for senator. His majority over B. J. Bethurum of Lexington may exceed 20,000. John W. Langley of Pikeville was nominated on the Republican ticket to succeed himself in congress. Congressman Langley, who appealed from his federal court conviction of conspiracy to violate the Volstead act, made his campaign on what he chose to call a "vindication" of his record.

Five Democratic and five Republican candidates for congress were opposed. Other congressmen who had opposition were renominated. The successful candidates include Congressman Langley, Republican, Pikeville; Fred M. Vinson, Democrat, Louisville; R. Y. Thomas, Democrat, Louisville; J. M. Robinson, Republican, Barbourville; Virgil Chapman, Jr., Democrat, Paris; Sam McMeekin, Democrat, Louisville.

Fare Rate Agreed Upon.

Cincinnati, Aug. 4.—A fare of 7½ cents for adults and 3½ cents for children, for a period of three years, was agreed upon by the representatives of the city and the Cincinnati Traction company, who are negotiating a new traction franchise.

It was announced at Rome that a final decision on the application of Count Boni de Castellane for annulment of his marriage to the former Anna Gould, now Duchess de Talleyrand, will be given by the vatican late in December.

CRITICISES GOVERNOR BRYAN

Senator Reed of Missouri Upholds Defense Day Program.

Kansas City, Aug. 4.—United States Senator James A. Reed of Missouri issued a statement here in which he favored the national defense day program. He characterized the refusal of Governor Bryan of Nebraska and other state officials to co-operate in the defense day program as a blunder, saying he would prefer to accept the judgment of General Pershing to that of Governor Bryan and others as to any military maneuver.

Read continued: "Every citizen possessing common sense knows that the day may come when some great power or combination of great powers may attack the United States. The sole purpose of the defense day program is to develop the best possible plan for the mobilization of our resources, so that nations will hesitate to attack us and, should they do so, to repel that attack with the least possible loss. The very object of the experiment is to discover these errors in advance, instead of waiting to learn them on fields strewn thick with the corpses of American boys."

Sues For \$50,000.

Martins Ferry, O., Aug. 4.—Ray W. Tidrick of Holloway, near this city, filed suit for \$50,000 damages at St. Clairsville against Edison Russell, 18, who four years ago shot the former's wife, Margaret Tidrick, as she was crossing the Russell farm while returning from a berry picking expedition, causing the loss of her foot. Tidrick alleges that he lost his wife's society for many weeks and that the injury is unhealed. He charges the boy's parents with conspiring to have his wife shot and also named them as defendants.

Prisoner Pardoned.

Columbus, Aug. 4.—James M. Taylor was pardoned from the penitentiary by Governor Donahy because of physical disability. He was sent up from Belmont county in March, 1923. Taylor, who was serving a life term for second degree murder, is in "imminent danger of death," according to a certificate furnished the governor by Dr. Willis A. Whitman, penitentiary physician. He was ordered to his home in Alabama.

Famous Novelist Dead.

London, Aug. 4.—Joseph Conrad, 67, famous English novelist, died at his home in Bourne, England. He was noted for his sea tales.

MARKET REVIEW

Columbus, Aug. 4.—Market conditions during the past week are reviewed by the Ohio division of markets as follows:

LIVE STOCK AND MEATS—Chicago hog prices ranged from 10c to 15c higher than a week ago, closing at \$9.65 for the top and \$8.69 40 for the bulk. Medium and good beef steers 25c lower to 5c higher at \$7.25@11.25; butcher cows and heifers 10c lower to 25c higher at \$4.50@10.25; feeder steers 25c lower at \$3.50@9.25; light and medium weight veal calves 25c lower to 25c higher at \$7.75@10.50; fat lambs 25c to 50c higher at \$11.50@14; feeding lambs 25c to 50c higher at \$8.75@12.75; yearlings 25c net higher at \$8.75@11.75; and fat ewes, 50c to \$1 higher at \$4.75@7.75. In eastern wholesales fresh meat markets beef is 50c to \$1 higher, veal \$1 lower to \$2 higher, lamb and mutton \$1 to \$2 lower and pork loins and hams \$2 to \$3 higher. Aug. 2 prices: good grade of meats: Beef, \$15.47; veal, \$14.47; lamb, \$20.24; mutton, \$15.16; light pork loins, \$19.24; heavy loins, \$14.61.

FRUITS AND VEGETABLES—Eastern shore Virginia Irish cobbler potatoes steady to stronger in eastern cities with price advances of 25c to 50c in some markets, closing at \$2.25@2.65 per barrel, slightly weaker in Chicago at \$2.50, carlot sales nearly steady at \$2.40 c. b. Maryland eastern shore cobbler sold on the same level as Virginia stock. Georgia elberta peaches steady to firm in most markets at \$1.75@2.25 per bushel basket and six-basket carrier, slightly weaker in New York and Chicago, ranging \$1.60@2.25, stronger at \$1.35@1.50 c. b. Delaware, Maryland and Virginia apples, yellow transparents and oldenburgs, ranged \$1.25@2.25 per bushel basket in eastern markets. \$2.50 for best stock in Pittsburgh.

GRAIN—Wheat markets develop a weaker tone as weather conditions improve. Corn prices higher, both cash and futures reaching new high levels. Oats slightly higher for week, but market weaker at close. Quoted Aug. 2: No. 1 dark northern spring wheat, Minneapolis \$1.35@1.47; No. 2 hard winter wheat, Chicago \$1.32@1.34½; Kansas City \$1.29@1.31; St. Louis \$1.29@1.31; No. 2 red winter wheat, Chicago \$1.34½; Kansas City \$1.32@1.33; St. Louis \$1.33@1.34; No. 2 yellow corn, Chicago \$1.13½@1.14; Minneapolis \$1.10½; No. 4 yellow corn, St. Louis \$1.12½; No. 3 white corn, St. Louis \$1.12; Kansas City \$1.07; No. 3 white oats, Chicago \$1.05@1.06; Minneapolis 50% \$1.04½; St. Louis \$1.04@1.05.

DAIRY PRODUCTS—Butter markets unsettled and irregular. Closing prices, 92 score: New York 37½c, Chicago 36½c, Philadelphia 38½c, Boston 38c. Cheese markets continued firm with active demand. Closing prices at Wisconsin primary markets Aug. 2: Twins and singles daisies 18½c, longhorns 18½c, square prints 19c.

HAY—Eastern hay markets 50c to \$1 lower. Quoted Aug. 2: No. 1 timothy, Boston \$21.50, New York \$20, Pittsburgh \$24, Cincinnati (new) \$17, Chicago \$17, Memphis \$23. No. 1 alfalfa, Phoenix, Ariz., \$17.50, Los Angeles \$16.

Destruction of Forests

Fire loss in the forests of America each year covers a total area more than eight times that left devastated in France at the end of the great war.

Must Feel Love

The AMERICAN LEGION

(Copy for This Department Supplied by the American Legion News Service.)

REGIONAL BILLETS FOR WAR ORPHANS

With the dedication recently of the American Legion's children's billet at Otter Lake, Mich., the Legion has gotten under way with a nation-wide program of child welfare. Specifically, the Legion intends to care for all the children whose fathers were killed in action or who died as a result of service in the American forces during the World war.

There are at present, according to experts, 5,000 waifs of war who are being denied childhood privileges because their fathers died in service. By the creation of regional billets the Legion intends to care for all of these. The plan outlined by the national child welfare committee of the Legion allows for expansion to meet the requirements ten years hence, when the peak load will be reached—35,000 of them.

The billet at Otter Lake, Mich., is typical of the Legion's method of handling this important phase of service work. It is neither an institution nor an orphanage. It approximates a home as far as it is humanly possible. Instead of having one big dormitory, the way most institutions are run, the Legion has small cottages of from four to six rooms. Nine children at the most are housed in one building, where they are looked after by a house mother. The children dress as other children, with no semblance of uniformity. They attend public school, leaving in the morning, taking their lunch, and returning about five o'clock in time to play until supper time.

The Otter Lake billet, which is the first regional billet, now cares for 23 children, with three houses built and ground broken for two more. These children are of every extraction—Hungarian, Polish, French, Italian and the like. Many of them came to the billet in extremely poor health, emaciated and undernourished.

Overlooking Otter lake, one of the prettiest of Michigan's thousand lakes, the billet is ideal for health purposes and, under the guidance of Mrs. Eva Ingersoll, supervising mother, the food prepared is based on body-building needs. Dr. O. Johnson, the superintendent, looks after the health of the children and not one case of serious illness has been reported since the billet got under way.

The need for more room to handle the fatherless children is manifested by the constant requests for permission to send children to the billet. A waiting list ample in size has convinced the Legionnaires that they need more space. As fast as the money is available such expansion is taking place.

The Michigan billet was first begun as an activity of the Michigan department of the Legion, with help by the legislature. However, when the national organization of the Legion went into the problem, Michigan graciously turned over her billet to the national body.

The second child billet is now under way at Independence, Kans. John R. Quinn, national commander of the Legion, recently dedicated a 400-acre tract of land, where the second series of cottages will be erected. Kansas raised \$100,000 to insure completion of the project by a state-wide drive for funds. The tract of land was the gift of Daniel Dabney, whose two sons were killed in action while serving with the American forces in France.

Not only does the Legion care for children in regional billets, but it also cares for them in childless families. Following precedents established by social workers, the Legion seeks about for ex-service men who have no families and who wish to rear one of the waifs of war, and allows them to adopt one. The Legion takes exceptional care in investigating circumstances so that the child will get the tender care rightfully due.

In other instances the Legion has found that the mother does not wish to be separated from her child. In such an event the Legion furnishes cash support.

The need for such welfare work is proved when it is known that the government does not compensate a widow sufficiently to insure adequate support. A widow with no children receives but \$25 a month. With one child, she gets \$35, and \$6 for each additional child. As a result, it is necessary for her to work to support herself, and if her child is very young she must place it in a nursery. If the child is but a few years of age the Legion has found that it runs wild and, in many cases, the environment is such that it becomes a gamblin.

The child welfare activities of the Legion are the most important, next to the care of the disabled, on the Legion's program of national service.

Legion Men Will Protest

Protests against granting citizenship to men convicted of various serious offenses will be made in future by the American Legion of Belmont county, Ohio. This course was decided on after papers were granted to several such men there. A committee was appointed to investigate the character of applicants for citizenship.

Wanted Quiet

Lester was taken by his mother to an all-day meeting of the ladies' aid. He got through the morning hours fairly well, but along at 3 in the afternoon the buzz of 50 voices had racked his nerves, for he said: "Mother, let's go where womans ain't."

Significant Word

Aloha may be translated in many ways—as welcome, greeting, friendship, love, brotherhood, mutual understanding and good-by until we meet again.

Now is the time to subscribe for the Union-Herald. We give \$16 in Aer-O-Plane Bonds for each \$1 paid on subscriptions to either Daily or Weekly.

Something New and Different

Every Monday morning from now on until further notice we are going over our stock and pick out ten pairs of Ladies and 10 pairs of Men's Shoes or Oxfords that we are going to sell at

\$2.95

no matter what the former price has been or what make of shoes they are. These 20 pairs of Shoes must sell on Monday or Tuesday of each week or they will be put back in stock again.

These 20 pair of Shoes will be put on display inside of our Store and not in our windows. If your size is in this lot of 20 pairs you will be lucky. It will pay you to investigate this sale every MONDAY and TUESDAY of each week until further notice.

Come in early on Monday morning and get a real bargain (don't be too late.)

This type of sale is to eliminate our stock of odd sizes and pairs; there will be shoes in this sale that sold for \$4.00, \$5.00, \$6.00 \$7.00, and \$7.50. Don't neglect coming in every Monday morning early and looking over the 20 pairs on sale, you may find just the kind of a Shoe you want, for \$2.95.

Right Now— PEARL for Screens!

RIGHT now you are beginning to think about screens—so now is the time to investigate G&B PEARL Wire Cloth—aristocrat of all screen materials. This material is the best wearing and best looking screen of its kind. It so far outlasts painted and galvanized cloths that there is no comparison.

The reason is simple. Rust, not wear ruins screens. G&B PEARL Wire Cloth is as near rust proof as metal can be made. That's the whole story. It requires no paint—no repairs and is the best looking material that ever screened a porch or door or window. Clean and sanitary, too.

There are lots of screens that look like PEARL but don't wear anywhere near the same. So—play safe—see us. We sell genuine G&B PEARL with the 2 Copper Wires in the Selvage and the G&B Round Tag on every roll.

FRIEDMAN'S
APPAREL FOR WOMEN

Oldest Book in Brazil

The oldest known book relating exclusively to Brazil is the "History of the Province of Santa Cruz," which was published at Lisbon in 1576. Its author is Pedro de Gandavo, of whose life little is known.

The Moving Mystery

No one has ever discovered the secret of perpetual motion, although, scientifically, nothing in existence is ever still. In other words, nature alone knows the way to keep things moving.

Youth and Grace in Woman's Dress

Leading Designers Aim to Please, Knowing Wishes of All Ages.

Poor madame! Having a love of the beautiful and a discriminating taste in dress, and being fortunate in the possession of a long purse, she still is as badly off as Flora McFlimsy, with nothing to wear—unless she has succeeded in retaining that slim silhouette. Under the autocratic rule of designers, observes a fashion writer in the New York Times, an ideal has been created and a standard established, and life, as to clothes, is simple for the woman who meets the requirements, though otherwise it is a problem requiring devoted attention and involving many difficulties.

It is as if the whole world of fashion makers had conspired against the woman who is smart, yet not neces-

Judged by her silhouette—so it be de rigueur—any woman in these times may wear anything she chooses, and usually she is successful, for American women are graduates in taste and style. For them the best designers of Europe and America have worked out models that will please the fancy and comfort the heart by keeping youth and grace in the figure.

The fashionable woman of a generation ago was unaware of the architecture that reconstructs the figure to the present model. To summarize, she wore stays, and crinoline, and bones. These belong to the Dark Ages, as far as concerns the modern woman; which greatly simplifies the task of the modiste who helps the middle-aged woman to express taste and style in her appearance.

The waistline dropped to the point of the hip was the life-saving innovation. To that is drawn the long V-shaped neck, the gracefully tapered shawl collar, the wide cascading cape, the jabot. The skirt, in slight drapery, is caught usually with a motif of flowers or jeweled ornament, or a garniture that trails in lengthwise line to the bottom of the skirt.

One-Piece Gown, Real Test.

The one-piece gown, the real test, has many variants, the essential of which is the coat dress. This, in light or heavy materials, is becoming to every figure of any proportions. The gown proper is made in a straight model, with a panel, like a full-length waistcoat, whether plain and fitted, or plaited and held by a belt or girdle. The idea guides the fashioning hand in some of the latest French evening gowns of lace and tulle over slips of satin and metal tissue, and is charming in a subtle sort of way.

The tunic, which may be three-quarters, seven-eighths or full length, is one of the most comfortable and entirely satisfactory models suitable for older women. The silk jersey tunic for daytime and the beaded tunic for evening wear were brought out several years ago, isolated, single and "extreme" styles, that took at once. They concealed so much, softened so much and were so altogether slenderizing that they have been developed and diversified into every type of tunic possible to the designer.

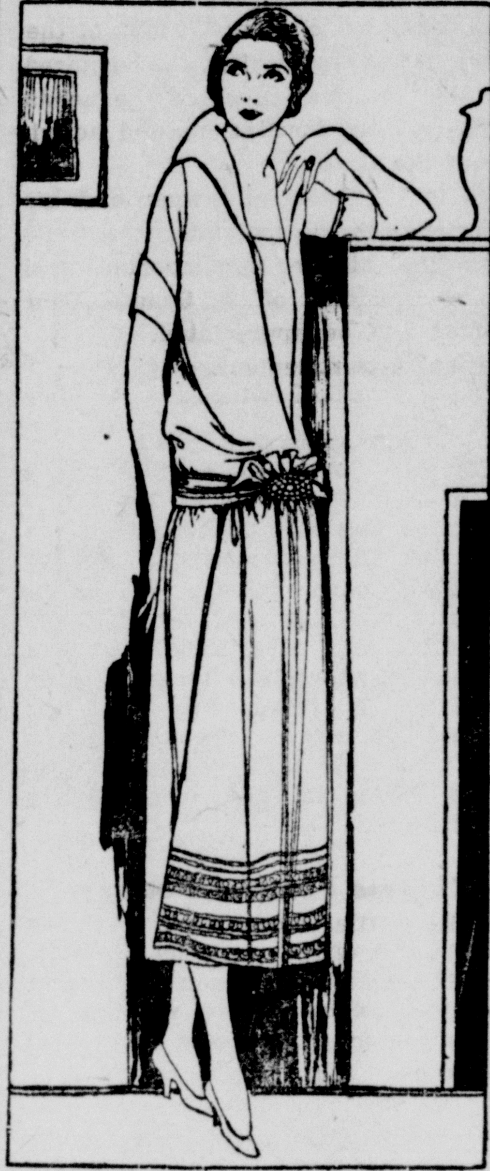

Worth, Beer, Jenny, Molyneux, Cheruit are now giving us one-piece gowns. Jenny, Alice, Bernard, Louise-boulanger, Premet, Doeulillet, Drecoll, to mention special and representative designers, present interesting variants of the tunic, and Poiret, Lanvin, Jeanne Halle, Doucet, Patou are among those who illustrate the saving grace of a slight lift of the skirt in draped lines.

No preceding season has offered as much inducement in material for slender modeling and graceful drapery. The soft silks, crepes, voiles, marquisette, and all the shades of weaving in sheer fabrics respond to the artistic designs cannily established for the clientele to whom it matters so vitally.

Shown in Knitted Wear.

All these are successfully illustrated in the knitted goods—light, gossamer woolens, silk jersey, roshanara crepe eponge, pongee and alpaca.

Plaits—the tunic of narrow plaiting entire—long, slender panels, and rows of buttons outlining the frock from

Maize Silk Etamine Embroidered in Scarlet Floss With Coral Ornament.

sarily slim and curveless. The most tempting models are for the boyish figure, and to place them further beyond the reach of any other, the original French models are confined to sizes no larger than "38." The saleswoman usually displays this to the timid, almost apologetic customer, as being "the very largest size we carry." Many a woman knows the moral courage it requires to suggest that it might be altered to fit her or to continue the search for something larger.

This applies, of course, to the woman who longs to possess the original and wishes to avoid, if possible, the irksome experience of being fitted. She of the youthful figure, with fresh skin and hair of natural shade, still finds that, unless she has kept her figure and avoided pounds within bounds, she is "hard to fit," and, being a plump 40, is distressed to find that the type of frock that was charming on a "perfect 36" looks quite different on her. It is a sad disillusionment and warranted to ruin the best dispositions.

To be unsympathetic is handicap enough, but to have arrived at the period when one must acknowledge or be reminded that moyen-age styles are the correct thing for one is to realize, they say, the first gray in the otherwise bright sky of a merry world. For the woman of fashion who has put off this somber day by being industrious in training, the way is still pleasant and the best and most beautiful things created by Parisian artists are for her as long as she desires them. Hair can be camouflaged, dog collars are for telltale necklines, angel sleeves soften sharp angles—and many another trick may be turned. But when moyen-age adds silver to the hair and pounds to the figure there is cause for despair and the question of dress becomes acutely important.

French Women Reticent.

It is something a French woman never admits except to herself. Whatever is becoming she will wear, and she critically views herself and decides that illusion and effect come of emphasis of her points of charm and of subordinating, negating, as it were, the marks of the years and the evidences of too much enjoyment of ease. She knows the value of having hair perfectly coiffed and hands and feet immaculately clad. She realizes, sometimes with a bit of a jolt, that a rounding back is betraying her age as plainly as if she told it aloud, and immediately she stands like a sentinel, with perfectly flat back and lifted chin that fairly shout "youth!"

These points are called to the attention of wistful clients by the designers who go into the psychology of dress, and it is they who take the age out of moyen-age in their designing.

Some of the older artists, Worth, Paquin, Drecoll, Redfern—master hands in the art of gowning women—seemed to have a special sense in this important service, and their clients looked always so well and so becomingly dressed that the evidence of age was artistically softened and dignified. But these had not the standards of today to meet.

Woman Novelist Led

Maria Edgeworth is regarded as the inventor of the novel with a purpose, of which kind "Castle Rackrent," which sent her name into immediate fame in 1800, is a typical example. Her success with her Irish novel had much to do with turning Sir Walter Scott to the writing of prose fiction.

Differed on Masterpiece

Lord Byron, among authors often called the greatest lover, differed from the public as to what was his best work. He held that "Childe Harold" was by far his masterpiece, but the public gave the distinction to "Don Juan," written between 1818 and 1820.

16 TO 1.

We give \$16 in Aer-O-Plane Bonds for each \$1 paid on subscription to either Daily or Weekly Union-Herald.

Dreams

Dreams occur when sleep is light and generally after 4 o'clock in the morning. Remembering dreams is something of an art and is developed by practice.

That's Important, Too

"An argument 'bout religion," said Uncle Eben, "is liable to git people more interested in tryin' to be smart than in tryin' to be good."—Washington Star.

HERRICK REFRIGERATORS

The Big Difference In Refrigerators

The main object of any refrigerator, of course, is the preservation of foods. The refrigerator that will keep foods in perfect condition longest is naturally the refrigerator you want—provided it doesn't increase your ice bills.

The Herrick answers those requirements with facts—not claims. And it does even more. It actually decreases your ice bills while giving you more effective food preservation.

And why? Simply because the Herrick is far more than an ice box—far more than a cold storage place. It is built on the scientifically demonstrated principle that more than merely cold air is necessary to keep foods in good condition for any great length of time.

Perhaps the biggest essentials to scientifically correct refrigeration are—

- No. 1. Circulation of cold dry air.
- No. 2. Effective Insulation.
- No. 3. Air-tight construction.

That the Herrick has these necessary essentials is a demonstrated fact.

Many proofs of the truth are visible even to the least informed purchaser. Others are hidden within the walls of the refrigerator, but nevertheless there, performing their functions so important to good health and economy.

The Store With the Fitting Service

Semi-Tailleur Designed to Slenderize Silhouette; Built of Alpaca.

top to bottom, accentuate length and have a slenderizing effect and are somehow younger and more chic than the plainer models. Some of the most exclusive shops in New York are offering these semi-tailleur suits in white, white-and-black or collars in stripes, and sharply marked bars. One that is liked by ultra-fashionable women is an informal outfit—skirt of white jersey, plaited; overblouse of crepe, embroidered in colored crests, and three-quarter sweater coat of the jersey, with deep shawl collar, large pockets, and narrow belt of glace kid.

The overblouse, touching the knee, is the answer to many difficulties in the summer outfit for moyen-age. It is soft, supple, yet straight, dropping with its own weight, and is worn unbelted. The skirt beneath, whether it is plain, plaited or flared, adds grace to the figure and is flattering to feet and ankles.

DIED IN HOSPITAL

Eugene Pitt Whitcomb, President of
Logan Gas Company.

Eugene Pitt Whitcomb of Pittsburgh, Pennsylvania, president of The Logan Gas company, died Saturday morning, August 2, at 3 o'clock at Johns Hopkins hospital, Baltimore, Maryland, after an illness covering several months. His death occurs practically coincident with the twenty-second anniversary of his connection with The Logan Gas company.

Mr. Whitcomb was truly a pioneer in the oil and gas industry entering into such activities forty-eight years ago at Bradford, Pennsylvania.

It is said of him, "He was in every sense a selfmade man, who, from a modest beginning, rose step by step until he attained a truly eminent position in his calling. He was most considerate in his attitude towards his associates, employees and all with whom he came in contact and his unswerving interest in the welfare of everyone endeared him to all. There was an entire absence of autocratic bearing in his attitude and it was his pride that the company organization functioned as a big harmonious family."

"He was equally mindful of a personal and company duty to the public served and always insisted upon a frankly open attitude upon all questions and policies affecting public welfare. He was most generous in response to worthy appeals for assistance and denied none a helping hand in time of need. He gained his high position because of sterling worth and splendid integrity and held it with abundant credit to himself. He was a man truly great and his greatness was emphasized by his superlative simplicity."

Out of respect for Mr. Whitcomb the local offices of the company will be closed at 2 p. m., for the balance of the day on Monday, August 4, the same time set for his obsequies."

PERSONALS

Miss Wilda East, of South Perry, is visiting friends in Columbus.

Miss Faith Chafin, of Columbus, spent Sunday with relatives at New Holland.

Mrs. Myrtle Metzger of Westerville, who have been visiting relatives here has returned home.

Miss Mary Klepinger, of Eaton, who has been the guest of Miss Mary Radcliffe, has returned home.

Mrs. Charles Anderson, of Columbus who has been the guest of her brother Mrs. James Funk, at New Holland, has returned home.

Charles H. Diehlman and son, John left today for Archbold for a week's visit with his parents, Mr. and Mrs. John Diehlman.

Miss Claribel Steele, of Westerville, who has been the guest of her mother, Mrs. Jennie Steele, of North Court street, has returned.

Mr. and Mrs. Daniel T. Ryan, who have been enjoying a week's vacation visiting relatives at Xenia and Columbus, have returned home.

Mr. and Mrs. Melvin Rinehart, who have been visiting relatives at New Madison and other points for the past month, have returned home.

Mr. and Mrs. H. G. McFarran, Steubenville, who have been guests of Mr. and Mrs. Robert Swinehart at Adelphi, have returned home.

Mrs. F. J. Pond, Mrs. Homer Depue and Miss Irene Parrett were guests of Mrs. Frank Robinson at a dinner today given at the Scioto Country club, Columbus.

Mr. and Mrs. J. H. Gilliland and son, Ned, of Columbus, were Sunday guests of Mr. and Mrs. A. W. Davison, of Jackson township. Mrs. Gilliland is a sister of Mrs. Davison.

Warren H. Baker, C. A. Bolender and Russell Howard, of the local rural mail carriers force left today for Van Wert to attend the state convention of rural mail carriers.

Mr. and Mrs. Willard Story Sr., of Chillicothe, and Mr. and Mrs. Willard Story Jr., and little daughters, of Washington C. H., were guests Saturday of Mr. and Mrs. C. K. Howard, of East Main street.

Mrs. Ella Friend and daughters; Mrs. Minnie Hart, of Montgomery; Mrs. Dottie Robinson, of New York City, and her sister, Hazel, and Miss Lizzie Friend, spent last week with Mrs. Friend's sister, Mrs. John Roop.

Civil War Costly

The World war, of course, cost by far the greatest sum in human history, but the Civil war in the United States holds second place for expenditures, notwithstanding European wars often have lasted longer. The Civil war's monetary toll was about \$3,000,000,000. The Franco-Prussian war costs were only about half that amount.

BOBOLINKS

Secure Building Lot Before Proposing to
His Mate.

Just as a man must have a home and a visible means of support before he can properly marry, so must the bobolink guarantee protection and have a building lot before he secures a mate. When the birds return in the spring from their southern migration, the first arrivals are males only. In early May flocks of cock bobolinks can be found living and feeding in perfect amity. Toward the middle of the month the birds widely scatter. Observation will show that each bird holds sway over a section of the meadow and that intrusion by a rival is met by attack. The proud possessor has a favorite perch, a bush or a tall weed, from which he pours forth his song. He is advertising to the newly arrived females of the species that he is the owner of a fine suburban plot, with assurance of all the necessities of bobolink life, and that he is prepared to erect a one-roomed bungalow. He also informs other males that this particular territory is occupied and that all trespassers will be dealt with severely. A female approaches the territory and, if pleased with the prospects, remains as his mate. The little space of meadow becomes sacred to the newly wedded pair, and nothing short of death will separate them.—Lee S. Crandall in The Mentor for August.

GRAPE CULTURE

Exhibits Will be Made at Ohio Experiment Station August 15.

A vineyard of more than a hundred varieties of grapes, illustrating methods of culture, pruning, the results of fertilizing and different cover crops, will be one of the attractions at the Ohio Experiment Station, Orchard day, August 15.

The vines are loaded with grapes, offering an excellent opportunity to study varieties and to select lists for home and commercial planting. Of the 130 varieties in the experiment, Moeres Early, Diamond, Niagara, Worden, Brighton, Concord, Delaware, and Catawba, named in order of ripening, are favorites for home and commercial planting. Captivator, Caco, Portland, Brocton and Hubbard are the most promising new varieties. Grapes are among the most prolific and wholesome of home-grown fruits and with a little attention to spraying pruning and fertilizing can be grown successfully anywhere in Ohio. A few vines of the best varieties if well cared for will furnish delicious fruit for the home from September to Christmas.

IT PAYS TO WATCH

THE FEED MARKET.

A late quotation from central markets shows that 60 per cent protein tankage is now selling for little more per ton than corn. Again and again the feed market favors the man who has cash or credit enabling him to lay in the necessary supply more cheaply than when livestock men generally are in the market for feed.

This unusual price relationship will not likely continue long. With livestock on grass, especially in times of money stringency, there is much less demand for protein feeds, with the result that manufacturers and jobbers are eager for business.

High protein tankage is known to be one of the best commercial feeds for hogs. In tests at the Ohio and other state experiment stations, tankage in limited amounts has proved profitable to feed to pigs even on pasture when they have less need of protein material due to the consumption of grass or forage. In winter rations high protein supplements are a prime necessity. Since tankage has ordinarily sold for fully twice as much per ton as corn, the farmer who is in position to take advantage of the very low price is fortunate.

PROBE UNDER WAY

Prosecutor Would Place Blame For
Collisions at Cleveland.

Cleveland, Aug. 4.—An investigation of the rear-end collision of two city bound trolley trains on the Rapid Transit lines in Shaker boulevard was begun here today by County Prosecutor Edward Stanton. The crash resulted in the injury of 11 persons, including three young women and a 10-year-old child. Stanton decided to investigate this crash and another of a similar nature, which occurred on the same lines on June 9, and which ended in the death of one man and the injury of others. Stanton's decision to investigate followed a request made by Fred H. Caley, secretary of the Cleveland Automobile club, who was injured in the June 9 collision and who is a daily rider on the rapid transit cars. Caley is a member of the accident prevention committee appointed recently by Governor Donahoe.

J. F. ATWOOD

State senator from this district for four years and candidate for nomination for lieutenant governor at the Republican primaries, August 12.

Author of the Anti Theft Automobile law and many others of great importance to the state. As chairman of the Senate Finance committee, he acquired valuable information as to the needs of the various institutions and activities of the state.

He is a successful lawyer and his experience in the legislature eminently qualifies him for the important position of President of the Senate. Your support will be appreciated. Political Advertisement.

Alienation Suit Filed.

Cleveland, Aug. 4.—A \$50,000 suit for alleged alienation of his wife's affections was filed in common pleas court by Harry J. Anis, a Shaker Heights fireman, against William A. Pinter, a real estate broker, just five days after Anis' wife, Anna, died in a hospital of poison she took when he asked for a divorce July 19. Anis claimed his wife, whom he married here June 19, 1922, frequently received Pinter at their home during his absence.

Chinese Fond of Poultry

While cattle, hogs, sheep and fish provide part of the meat diet in China, probably the most common of all meat food is poultry. Many varieties of chickens, ducks and geese are raised and eaten.

MRS. HARLEY BUSH

Died Sunday Morning - Funeral Services Tuesday Afternoon.

Mrs. Rose Bell Howard Bush, wife of Harley William Bush, died at her home, 315 West Huston street, Sunday morning, August 3, at 12:35 o'clock. She had been three days and her death was due to childbirth.

The deceased was born in this city February 25, 1880. She was twice married. Her first husband was Thomas Bow and her second was Harley W. Bush, who survives. Two sons and two daughters survive their mother. They are Dennis Bow, Luther, Ethel and Ruth Bush.

Of her immediate family there are living two sisters. They are Mrs. Gertrude Cave, of Cleveland and Mrs. Alice Fisher, of Columbus.

The funeral services will be held Tuesday afternoon at 3 o'clock from her late home. Rev. E. D. Paulin will officiate. Interment in Forest cemetery.

CREEK CULVERT

Span of Arch Will be 56 Feet at the Bottom.

The new Hargus creek bridge on North Court street will not be a bridge with iron girders, but will be a concrete elliptical arch resting on two abutments with a clearance of 56 feet at the bed of the creek.

The contract is in charge of H. B. Watters, chief engineer. Mr. Watters was a former chief engineer of the D. T. and I. railroad and left the service of that company when Henry Ford bought the road. W. H. Moss is general foreman in charge of the work at Hargus creek.

The chief engineer says that the old arch will be wrecked this week by placing dynamite under the keystone and this will allow the arch to fall into the creek. As soon as the eastern half of the arch is finished it will be given three weeks to dry out and the western half will be wrecked as soon as the Scioto Valley Traction rails can be moved over on the new archway. Mr. Watters is of the opinion that the work can be finished in three or possibly four months, at the outside.

CHECK WORKER

Affidavit Filed Against Ira H. Sines—Several Merchants Duped.

Yellow colored checks of the Market Exchange bank, of Columbus, signed by Ira H. Sines and H. R. Sines have been cashed by a number of merchants the past week. A man answering the description of the check passer, was arrested at his home on South Scioto street Saturday evening and was lodged in the city prison.

An affidavit against Ira H. Sines, signed by L. M. Butch charging the prisoner with cashing checks with intent to defraud was filed. Among those on whom checks were passed are The Joseph Clothing company, Fred Fissell, L. M. Butch, A. C. Cook, Charles L. Mack and The Ford and Fordson garage. At the last named place Sines bought a used car and tendered check for \$106.

Shortly after obtaining the car, he proceeded to the county clerk's office and obtained a certificate of ownership which are used to obtain a car license. He even stood off the deputy clerk, saying he would be back in the afternoon and get another certificate. Mr. Brehmer found out shortly after taking the check that Sines had no deposit to cover the purchase in the bank and he went after the machine and got it back.

BARN BURNED.

A barn owned by Frank Arnold caught fire Sunday night in the village of New Holland and was destroyed. The barn was covered by insurance.

HOME COMING

At Brown's Chapel Thursday - Good Speakers to Make Addresses.

Special arrangements are being made for a big day at the Brown's chapel homecoming and fish fry, Thursday of this week.

An orchestra, together with some special singers will furnish music and a number of good speakers will address the people, among them being Secretary of State Thad H. Brown, of Columbus and Hon. Edwin D. Ricketts of Logan. Rev. A. B. Riker will talk on "The Farmers' Best Crop" and Dr. M. G. Phillips will have for his subject "The Community Spirit." Everybody is invited.

RAPS MAJOR PARTIES

Labor Report Indorses La Follette and Wheeler.

Atlantic City, N. J., Aug. 4.—Republican and Democratic platforms are denounced in the report of the executive council of the American Federation of Labor. Both parties are asserted to be "morally bankrupt" and manipulated by "machine politicians," who have involved the nation in "moral obliquity and unashamed betrayal." Coolidge and Dawes, Davis and Bryan, are dismissed as "unacceptable to labor." The La Follette-Wheeler platform is held to come more closely to the federation's line-up on domestic issues than either of the major party platforms. The report, which indorses La Follette and Wheeler, was adopted by the council.

Machines Waste Valuable Grain

Loss of Time and Money Prevented by Good Care of Thresher.

(Prepared by the United States Department of Agriculture.)

If a man in New York were to buy a ticket for San Francisco and then walk to Chicago before boarding the train you would think him foolish indeed. Yet, is not the farmer who plows his fields and sows his grain, cares for it through the long summer and carefully harvests the crops, only, upon threshing the bundles of loaded grain, to blow a large part of it over into the straw pile, liable to the same accusation? Inefficient operation of threshing machines is responsible for a great many bushels of wasted grain, says the United States Department of Agriculture.

Time and Grain Lost.
Any standard threshing machine will do its work with very little waste of grain or loss of time, if kept in good condition, adjusted properly for the particular job on which it is engaged, furnished with the proper amount of power applied correctly and watched intelligently while in operation. Nevertheless, it is true that a great amount of time is lost and a large amount of grain wasted unnecessarily in threshing.

All thrasher manufacturers have endeavored to make their machines as efficient as possible and the construction such that they will give a minimum of trouble. However, there are so many parts to a threshing machine, and it must work under such a wide range of conditions, that numerous adjustments must be left for the operator to make in the field, and careful attention is required for its successful operation.

If a machine fails to separate all of the grain from the straw it is usually due to one or more of the following causes: (1) The machine is not being run at its proper speed, (2) the cylinder fails to thresh all of the kernels out of the heads, (3) the separating mechanism is not level, or (4) the blast is not adjusted properly.

Crop Owner Interested.
Naturally the thrasherman is not so vitally concerned in getting every bushel of grain from the straw as is the crop owner, because it only means two or three cents to him for each bushel saved, whereas to the crop owner it means the price of the entire bushel, a matter of 50 or 60 cents, or more, depending upon the kind of grain being threshed and the price of it on the market. The crop owner, therefore, should be versed in the operation of the machine and at least know whether the separator man has his machine adjusted for the most efficient results possible.

Farmers' Bulletin 991, issued by the United States Department of Agriculture, has been written for the information of farmers who have grain threshing to do, and discusses the various points to watch in the efficient operation of the threshing machine. A copy may be secured, as long as the supply lasts, by writing to the United States Department of Agriculture, Washington.

Three Great Objects of Cultivation Discussed

In urging the proper tilling of the soil, the New York State College of Agriculture points out that cultivation has three main objects: Killing weeds, loosening the soil and saving moisture; further, this is said to be probably the order of their importance.

Weeds must be kept down and the earlier they are disturbed after germination the easier they are killed. The critical time is the period between planting and the time when the crop is large enough to cultivate without covering the plants.

For corn and potatoes, the tillage with the harrow or weeder is likely to be the making of the crop so far as cultivation is concerned. The start the crop gets on the weeds is likely to be maintained, especially in the rows.

Assuming good fitting of the soil and a reasonably good tillth, two inches is the maximum depth of cultivation desirable. Greater depth is likely to stimulate weeds by bringing up more seeds.

Make Good Fly Sprays

Solutions of any of the standard coal tar dips make good fly sprays. Add fish oil and whale oil to prevent the hair from becoming harsh or rough. A formula for making this fly spray is the following:

1 pint coal tar dip 6 pints whale oil
1 pint fish oil 3 pints oil of tar
1 pint coal oil
Dissolve three pounds of laundry soap in water, add the above materials. Add lukewarm soft water to make 30 gallons.

Spray for Potato Beetle

The Colorado potato beetle is controlled by spraying with 2 pounds of powdered arsenate of lead to 50 gallons of water. This spray should be put on when the insects first appear. The various worms that feed on the leaves of cabbage can also be controlled by this spray.

Growing Chinese Cabbage

Chinese cabbage is best planted in August when the soil is more suitable to its growth and it will furnish an abundant supply of greens for salad until killed by freezing weather. It may also be used for cold slaw or cooked like cabbage or greens.

VISITING IN TEXAS

Mr. and Mrs. W. J. Graham left Sunday for a month's visit with Mrs. Graham's brother, J. H. Croft, at Fort Worth, Texas.

Miss Alicia Rooney will have charge of Graham's shop during their absence.

**SEE WEAK POINTS
IN ARCHITECTURE****American Public Pays Little
Attention to Art in Building, Say Experts.**

Washington.—Weak points in national architecture were a subject of prolonged discussion at the architects' convention held in this city. The arguments were picturesque, but did not start any public debate whatever on the question of the builder's art.

This is said to be rather strange, inasmuch as the educated American likes to be on friendly terms with the arts. He has his own ideas about painting, literature and music. At the worst he knows what he likes, and at the best he has some technical knowledge and an innate sensitiveness which enable him to appreciate values. But he treats architecture like the proverbial red-headed stepchild. The poorest sort of oil painting is viewed as a work of art, but a building, unless it be a cathedral or a palace, is catalogued in the public mind only as a useful article.

In recent years architects have begun to urge that the public take an interest in their aims and achievements. They point out that so long as men live in houses architecture will play a more intimate part in their lives than any other art. The trouble is that until the public begins to regard its building as art it will learn very little about the technique of architecture; and yet until it knows something about the technical values it is not likely to take much interest in the artistic side of construction and designs. And there we have another of those vicious circles.

Roughly, a building can be judged by the educated layman according to common-sense standards of beauty, usefulness and appropriateness. A railway station that resembles a Gothic cathedral may be an efficient trainshed, it may be attractive, but most architects would feel that the combination of ideas involved is incongruous. There is no reason why Gothic style should be reserved for churches and college buildings, but because of the association of the Gothic with the beautiful old English cathedrals a bustling, noisy station is probably not the best sort of building for Gothic design.

Art vs. Usefulness.

Another example of unfitness is the building that is so rigidly artistic that it fails to be practical. The rooms, it may be, are drafty and badly lighted. The interior is poorly arranged for efficiency. Convenience has been sacrificed to effect, and the result cannot be termed fine architecture in the broadest sense.

With these ideas in mind, it is interesting to note a few of the high spots touched by the architects in their discussion of precedent. This is the subject which apparently worries the modern designer more than any other. Painters have their Impressionist and cubist schools. Writers develop new and strange literary forms. But architecture clings to the classic models. In fact, it clings so faithfully that the question was raised at the convention as to whether or not many of our famous buildings are not frank plagiarisms. What would we think of the artist who painted "Mona Lisa" for a millionaire, only changing it a bit to fit a given space in a library, or perhaps adding a note of red to tone in with the wall paper? But we think nothing of it if a new public building is a more or less faithful reproduction of the Parthenon or of some famous European palace.

Defense of the practice of imitation rests mainly on the argument that there is no American style of architecture and America can do no better than to adapt forms that are obviously beautiful and inspiring.

No architect believes in ignoring the fine work that has been done by the old masters. The most unconventional designers agree that they must draw on the ideas and technique of the great original designers of history. Their point is that in the Golden Ages of creative art designers managed to evolve buildings that expressed the spirit of the people and the times. The Italian renaissance artists did not feel that the Greeks and Egyptians had thought out all the possible variations of construction and that a sensible man could do no better than stick to their models. Nor did those medieval builders shudder at the sight of structures that could not be labeled Greek, Roman or generally classic.

What the builders of American cities are criticized for is that they have so far done their best work in foreign styles, and that they have not succeeded in using those styles to evolve anything typically American for our typically American and Twentieth century structures.

W. R. B. Wilcox, an Oregon architect, reminded the convention that present-day buildings have not a great deal in common with ancient shelters: "Ancient races," he said, "did not have our schools, libraries, hospitals, banks, factories, nor our commercial buildings. As for houses, temples and tombs, probably only the last-named were used in the way we use them."

Automobile an Example.

He pointed out that the designers of buildings could learn some things about esthetic expression of America from the automobile industry. Makers of automobiles have not gone to the old civilizations for quaint and beautiful and impractical types of vehicles. He went on to describe an imaginary

visit to an automobile plant such as we might have today if automobile designers had followed the methods of architects:

"On exhibition were a number of vehicles of historic design. They were advertised as the last word in automobiles. Among them were vehicles which looked for all the world like old Roman and Etruscan wagons, Italian barouches, German state carriages, French landaus, English coaches, Irish jaunting cars—all sorts.

"A salesman was explaining the difficulties met with in adapting a splendid reproduction of a Greek chariot to the necessities of an automobile; how concealment of the motor and provision of an invisible third wheel to take the weight borne by the tongue and horses in the original were strokes of genius. To objection of a possible customer that an arrangement which required one to stand while driving was uncomfortable the salesman replied that, although a seat would be a convenience, integrity of design proscribed its use—that a reputation for scholarly design was of too great value to be jeopardized by violated precedent."

No Immediate Progress.

The architects were more or less agreed that there is little prospect that a great American style in architecture will be developed in the immediate future. The builder's art at its best is more expressive of a community and an era than of the individual builder's personality. At present there is not enough unity in American traditions for any architect to express America in stone as the Athenian could express Greece. Each racial ingredient in the melting pot differs and each section of the country with its individual history and its individual natural conditions presents a different background for the designer to study.

The situation, however, is far from hopeless, all designers believe. Ralph Adams Cram told his fellow architects at the convention that in many American homes, colleges and churches precedent and tradition have been used as bases for real creative expression.

"In spite of plagiarism—or because of it," he said, "we all know perfectly well that there is more really good architecture being produced in America today than ever before, and far better than that of any other country in the world for the last 300 years."

**Wage-Earning Urged
on Would-Be Brides**

Berkeley, Cal.—The best training for matrimony a girl can get is by procuring employment for a while, in the opinion of Miss Cleo Murland, associate professor of vocational education at the University of California.

"As an apprenticeship for marriage," said Miss Murland, "wage earning is an essential feature. Economic freedom of women is a determining factor in the length of the pre-marriage period, in the stability of the home and in its maintenance. The self-respect of a woman, as well as her position in the family, is determined in part by her ability to be economically independent. More and more the daughter, as well as the son, seeks employment as soon as school days are over."

Miss Murland classified as the three distinct phases in a woman's development the time preceding marriage, the time of family responsibilities, and the time of middle age when she is released from these responsibilities.

She explained her views at a recent conference of educators. It was the conclusion of the conference that a girl should be educated both as a homemaker and as a potential wage-earner.

**Declares Education Is
Best Cure for Insanity**

London.—Despite the fact that in Great Britain there is today one insane person in every 200, contrasted with one in every 650 in 1870, there is no justification for the theory, so often expressed, that a process of racial degeneration is under way. In the opinion of E. J. Liddbeter of the Eugenics Education society, expressed at the recent conference of the National Union of the Professional and Industrial Blind of Great Britain.

Despite the increase in the number of insane, Mr. Liddbeter said, nature herself was constantly striving to regain the normal average, even in the highly organized and complex communities of the present day. Those of weak mentality, he said, attracted each other, and eventually brought about their own extinction in this way.

Mr. Liddbeter advocated education as the best prevention of insanity.

**London Rents Take Drop
Below Last Year's Rates**

London.—Despite the great inflow of visitors for the British exhibition at Wembley, furnished houses and flats in London are renting at a slightly lower figure than at the same time last year.

Flat owners, who expected to rent apartments to Wembley visitors at high figures, found, to their disappointment, that the newcomers preferred to stay at hotels. Prices dropped shortly after the influx of travelers began.

Meteor Hits Mountain

Pocatello, Idaho.—Motorists returning to Pocatello about ten o'clock the other night witnessed an unusual sight about half way between McCammon and Inkom, when a meteor fell on a mountain and rolled down its side, breaking into several distinct parts and throwing sparks in all directions.

MACK PARRETT

Study Operation of Farmers' Elevators

Many Avenues of Possible Loss Due to Small Capital.

(Prepared by the United States Department of Agriculture.)

A study of the operation of farmers' elevators throughout the "midwest grain-growing states is being made by the United States Department of Agriculture and the University of Minnesota in an effort to bring out the methods found to have produced success and those which may have been responsible for failure.

There are more than 5,000 such elevators in the midwest grain-growing states. Many avenues of possible loss are open to these elevators, due in part to limited capital, small volume of business, and the nature of the business itself, the study has revealed.

Other causes of financial difficulty may be the failure to insure properly the grain and other merchandise, building and equipment; failure to bond officials, bad accounts, failure to provide sinking funds to replace depreciating property, failure to collect full charges for services, failure to detect erroneous charges, losses in weighing grain, losses from overgrading grain, losses from dockage, and losses from ineffective hedging.

Preliminary results of the study have been prepared in a mimeographed pamphlet, entitled "A Study of the Operation of Farmers' Elevators," copies of which may be obtained upon request to the bureau of agricultural economics, United States Department of Agriculture, Washington, D. C.

New Fertilizers Reduce Freight Bills One-Half

High freight and labor charges have caused the state agricultural experiment stations to develop fertilizers which contain no useless substances. These high analysis fertilizers, as they are called, reduce freight bills from one-fifth to one-half. When all the other handling, hauling, and spreading operations are considered, the saving to the profit side of the farmer's ledger is not to be scoffed at.

A. W. Blair, professor of agricultural chemistry at the New Jersey State College of Agriculture, gives some figures to show what a large saving in freight results from buying the high-analysis fertilizers.

"Sixteen hundred pounds of a 5-10-5 will furnish just as much plant food as 2,000 pounds of a 4-8-4; one-fifth less freight and handling charges.

"Four hundred pounds of a 3-12-3 will furnish as much plant food as 600 pounds of a 2-8-2; one-third off for freight and handling.

"One thousand pounds of a 6-12-3 will furnish as much plant food as 2,000 pounds of a 3-6-1½; a reduction of one-half in freight and handling charges.

"There is a reason for the high-analysis fertilizer; hence, the high-analysis fertilizer has come to stay."

Potash Makes Much Land Profitable for Farmers

One may safely say that crops cannot be grown profitably on muck or peat lands until potash has been supplied to them in generous quantities. These lands are of vegetable origin, most of them containing possibly ten times as much ammonia as phosphoric acid or potash. The seriousness of such a condition in relation to plant growth is understood when it is remembered that plants usually require these three materials in practically the reverse proportions.

Thus we find muck land farmers in increasing numbers using fertilizers relatively high in phosphoric acid and potash. For example, the Ohio station is recommending a 2-8-8 fertilizer for onions and celery on muck land, while New York suggests an 0-10-10 for onions and 4-8-10 for celery. Indiana recommends an 0-12-12 fertilizer for cereals and general crops in case the soils are acid, while on non-acid soils, 0-8-24 or straight potash is advocated.

FARM NOTES

It never has paid to feed lice.

Overconfidence often results in overthrow.

Don't let the weeds get too big a start in the garden.

Good artillery for garden and orchard—a loaded spray pump.

You are on the wrong track if you use a scrub bull; he may be followed by a long train of evils.

Horses like pasture at any time, but it is not enough by itself to keep up the strength of work animals.

Don't be too sure that your dairy stock will win at the show. Put your best animals in training now.

One of the requirements for success in farming is to be able to see things that can stand improvement.

No direct harm is done by selling ungraded products, except that you must be content with a low price, and probably a smaller market.

Before making hay while the sun shines, better call up the farm bureau and find how long the weather is going to shine.

Sikh Protects the Honor of Captain Peter

By H. M. EGBERT

(© 1924, Western Newspaper Union.)

CAPTAIN PETER was in India, and his young wife in the old manor house in the West country; and it was very lonely there.

Captain Peter was fifteen years older than Elizabeth, who seemed hardly more than a child. There had been a little girl, but she had not been able to live in the hot, deadly climate of the Punjab; and when Captain Peter saw that the mother was likely to follow the child he sent her home to await his coming when his year of absence arrived.

Captain Peter had sent Rustum with her. Rustum was only the butler, but the captain knew that he would guard his young wife as the apple of his eye. "Take care of her, Rustum," he said. "Till death, Sahib!" answered the old Sikh.

But it was lonely in the old house, and, after she was strong again, Elizabeth had gay house parties there. Men and women came and stayed and went again, but Philip Field came more often than any, and stayed longer.

In the hall, high up on the paneled wall, hung an ancient Crusader's sword. It was so old that the rust had eaten out the shining steel like fretwork. And under it was engraved, in ancient Gothic script in the wood, a legend:

"When I hang here let peace abide O'er manor hall and countryside, But when my blade slips from this wall

Guard thou the honor of thy hall." Rustum knew of the legend, for there were many such in his own country.

And he would look keenly at Philip Field, as he sat chatting with his mistress, and the memory of Captain Peter would grow very strong in him, and of his promise.

"Do you know, I don't think that black man quite likes me," he said, laughing.

Rustum had gone to his quarters, and Elizabeth sat quite alone until—Till she heard a gentle tapping at the French windows, and started up, to see Philip Field standing upon the lawn outside.

He opened the windows and came in, and he and Elizabeth stood staring at each other. He advanced two paces and clasped Elizabeth in his arms.

Elizabeth caught her breath. She knew that she was powerless to resist Philip Field. The memory of Captain Peter had become very dim and distant.

"I love you," said Philip Field. "Tell me you love me too, Elizabeth!" "I love you," murmured Elizabeth, and her head drooped from shame. "I love you, Philip," she said.

Crash! Something had clattered on the wooden flooring of the hall, with a sound that seemed to shake the manor house. They started apart in terror. Then—because she was plucky—Elizabeth ran out into the hall. Upon the floor lay the rust-eaten crusading sword.

Philip Field followed her, and the two stood staring at each other in terror. Philip Field also knew the story of the sword.

Something had fallen with it. It was the section of the paneling which had been set into the wall a hundred years before. Elizabeth picked up the panel mechanically and read the inscription softly, with a dry throat.

She handed it to Philip Field, and he, too, read it. Then she went back into the reception room, and Philip Field followed her. She turned and faced him with a white face and trembling lips.

"Elizabeth! What of it?" he cried. "You must go, Philip," said Elizabeth huskily.

"I cannot go—" "You must go, Philip," repeated Elizabeth inexorably, and opened the French windows.

He pleaded, and he might have been pleading with a figure of stone. Presently he saw that all was over. Softly he stepped out.

Elizabeth shut the windows and went out of the room. Standing in the hall, she saw something she had not perceived before. The edge of the fallen panel was frayed, as though with a saw, and there was a tiny length of wire that had been snapped off in the fall.

That wire had been pulled from some other part of the house! "Rustum!" she called loudly. "Rustum!"

The turban of the butler appeared through the door that led to the servants' quarters.

"Rustum! The sword has fallen!" Rustum looked at her imperturbably. "I will replace it, memsahib," he answered.

He had a letter on a tray. "For memsahib!" he said.

Elizabeth took it. The postmark was three days old. Rustum had kept the letter back for the psychological moment.

"God bless you, Rustum," said Elizabeth.

"Good-night, memsahib," answered Rustum, retiring.

That night a letter went back to Captain Peter which proved to be the beginning of a new love and a new life.

Fruit-Producing States

California produces approximately 70 per cent of the oranges grown in the United States, Florida being the only other state producing any considerable quantity. Nearly all of the lemons grown in the United States are produced in California. A lemon grove near Santa Paula is said to be the largest in the world. The quantity of grapefruit produced is increasing, but Florida far outranks California in both quantity and quality.

Tars Superstitious

When the West Campgaw ran into 48 hours of ensuing gale and fog in a region infested with icebergs, the sailors attributed their bad luck to a hymn singing by two preachers who were working their way to Europe as cattle men aboard ship. The black robe of a churchman in the early Middle Ages was regarded as certain misfortune for the craft he sailed on.—Chicago Post.

Use for Old Leaves

Old leaves are being utilized in France for making paper, fuel and cattle food. They are crushed and chemically treated so that the powdered portion easily separates. The fibrous ribs and veins are then pulped and made ready for use in the manufacture of paper, while the powder is converted into fuel and cattle food.—Popular Mechanics Magazine.

Flotsam, Jetsam and Ligan

Flotsam, jetsam and ligan are English legal terms, the first referring to shipwrecked goods which float; the second, to goods thrown overboard, which sink and are lost; and the third, to goods which sink, but which are tied to a buoy so that they may be recovered. No owner appearing to claim them, goods which are saved are forfeited to the crown.

Shun Civilization

Deep in the polar wilderness on the banks of the Kookuk river, bereft of all desire for the vanities of civilized life, live a dozen men with fortunes ranging from \$25,000 to \$50,000, according to an old-time prospector who is at Sitka on vacation. The men have native wives and are utterly content with life within the Arctic circle.

Rivers Divide States

The Missouri river in South Dakota; Columbia in Oregon; Snake in Idaho; Rio Grande in New Mexico; Platte in Nebraska; Arkansas river in Arkansas; Missouri river in Missouri; Des Moines in Iowa, and Red river in Louisiana run completely through their states, dividing them.

Seed Requires Care

All commercial seed used in sugar-beet cultivation for the production of sugar is grown from "mother seed," which is carefully propagated from year to year at seed-producing stations under the control of scientists trained in this special branch of the work.

Established Schedule

"How do you like my niece?" "Fine!" "Yes, she is charming, spiritual, gentle, but unfortunately she hasn't a cent." "She seems to me to have all the qualities for becoming an old maid."—Le Journal Amusant (Paris).

Long Public Career

Daniel Webster was prominently identified with American affairs for nearly 40 years. From the day he first entered congress in 1813 till his death in 1852, he held, with few interruptions, responsible public office.

Battle Against Great Odds

The battle of Saint Jakob in Switzerland is famous for the gallant stand, August 26, 1444, of 1,000 Swiss against 20,000 Armagnac mercenaries. Only 16 Swiss survived the encounter, while the Armagnacs lost 8,000.

Wind and Waves

Contrary to popular belief, the wind's effect on waves is comparatively slight. It has been proved that the fiercest gale has no influence on the water below a depth of 50 feet.

Live This Life Well

There is only one way to get ready for immortality and that is to love this life, and live it as bravely and faithfully and cheerfully as we can.—H. Van Dyke.

Match This

Fair Angler (to guide)—Now, remember, please, that I desire to catch only fish that go well with tartar sauce.—Philadelphia Inquirer.

Uncle Eben

"It 'pears to me," said Uncle Eben, "dat de more votin' folks does de less dey feels like dey's havin' deir own way 'bout things."

Use for Golden Rule

Measure your own motives with the Golden Rule, and then the motives of others will appear more sincere.

Pretty Solid Watch

Emperor Charles V carried a watch in 1530 that weighed twenty-seven pounds.

Safety First

Never hold a nail for your wife to strike at.—Good Hardware.

Lie Most Despised

The lie that matters I abhor the most.—Cowper.

Byways

"I love living in the country," said a man who owes a lot of money in the Broadway district. "I love to walk along the country roads. You know you can't owe money to a cow."—New York Evening World.

Just Did Their Best

The great things in this world have been done by men of ordinary natural capacity who have done their best. They have done their best by never wasting their time.—George F. Hoar.

An Unruly Child

A woman, aged seventy-two, charged with being drunk, said: "I was upset because my mother locked me in a room and I had to jump out of the window."—London Tit-Bits.

Practically Ideal

Ah, how happy would many lives be if individuals troubled themselves as little about other people's affairs as about their own.—Lichtenberg.

Familiarity, Etc.

An idol may be undefined by many accidental causes. Marriage, in particular, is a kind of counter apothesis, as a dedication inverted. When a man becomes familiar with his goddess she quickly sinks into a woman.—Addison.

Atlantic's Open Channel

The Atlantic ocean is the only free channel for the exchange of water from poles and equator. It is the only ocean wide open at the north, and forms a valley which extends with varying depth from pole to pole.

A word to the wise is sufficient. Better have those winter clothes thoroly cleaned before it is too late. BEWARE OF THE MOTHS. Send them to Barnhill's South Court St.

Bricks of Molten Lava

The problem of utilizing volcanic steam in industry has been well worked out by the Italian engineers, and if we ever tackle the job in the Yellowstone park we shall enjoy the benefit of the lessons they have learned. Apparently the conditions to be met are similar; but in the Yellowstone the available supply of steam is incomparably greater, so that the "putting holes" of the Tuscany seem relatively insignificant.

Boring for steam has been going on for more than a year near the crater of Kilauea, on the island of Hawaii, but the rock is basalt and extremely hard, so that the drills have not yet penetrated very far. It is said that the scheme in that locality does not promise very well. But the Hawaiian government has consulted the Department of Commerce about a plan, seemingly practicable, for making bricks of molten lava from the Kilauea crater. It is proposed to extend a trolley across the crater, carrying an endless chain of buckets, which would scoop up the liquid lava, fetch it to the rim of the fiery hole, and pour it into the molds.—New York Times.

Gives Boy Scouts Camp

A 40-acre tract at Careyhurst, located at the mouth of the little Boxelder canyon, Wyoming, has been presented for a permanent camp site to the boy scouts of Casper, Wyoming, by former Gov. Robert D. Carey of that state. The waters of Boxelder creek flow through the beautiful grounds. A game preserve is nearby. Plans for the camp buildings include a large mess hall, kitchen and camp headquarters, and ten patrol cabins. Governor Carey has also donated all the steel bunks needed for the cabins.

Christian Poetry

Glades, flowers, and streams satisfied the poets of paganism; the solitude of the forest, the boundless ocean, the starry heavens, can scarcely express the eternity and infinity with which the Christian spirit is filled.—Madame de Stael.

Youth & Love

In every heart grows an evergreen tree—its name is love. So long as it flourishes you are young. When it dies you are old. We ought to be a little older at sixteen and a bit younger at sixty. Why not always be youthful?—Grit.

China Was Called Cathay

Cathay was the name given to China by Marco Polo in the story of his travels, and commonly used in Columbus' time. The great discoverer thought the New World was part of Cathay, which he was seeking.

Water Consumption

Records of cities show that the average quantity of water used each day per person ranges from seven to eight gallons among the poor, where there is only one faucet in the house, to about 60 gallons in the homes of wealthy persons. The average of an ordinary family in cities is estimated to be about 20 gallons daily for each member.

"The open way to what is right and fair is thro' knowledge of the facts"

Frankly Discussing Natural Gas Facts

Beginning a Presentation of Information of Vital Importance to Our Natural Gas Patrons

FIVE years ago when we began the negotiations with you and your public officials looking toward the re-adjustment of rates and service for natural gas which, since then, has proven to have been the proper solution of the perplexing problems of decreasing supply, in rendering service and in maintaining it, we pledged to you that the rates then established would be continued for two years, with the further provision that if at the expiration of that time conditions warranted we would maintain them for a longer period, or until such time as changing conditions necessitated another re-adjustment. We did not then contemplate that it would be possible or practicable to continue that schedule of then established rates until now; but owing to the very mild weather which has prevailed every winter since then, and the known fact that we have been most diligent and determined in our search for new territory, intensified drilling in new and old territory, and the purchase of gas where it was possible, we have been enabled to continue the supply, though by no means in such volume as would have been necessary for good service if severe cold weather had been experienced during any of the intervening winters.

However, the general condition of steady decline has continued to such an extent that a marked shortage was clearly in evidence every two-day cold spell during the last and the several previous winters, and had these cold spells prevailed longer, as would have been the case in even a moderately

severe winter, the shortage would have been acutely felt, this despite the fact that the making of extensions was discontinued a year ago. Had this action not been taken at least 6,000 more meters would have been added last year, representing the population of a town of 30,000, and the resultant effect would have been disastrous.

It is clearly evident, from the standpoint of public welfare, that this situation must not be allowed to continue without the most strenuous efforts being made to mitigate it so far as possible, and it must be apparent to all that any measures adopted to correct such conditions as outlined above must have a beginning long in advance of the desired accomplishment.

To this end the company has proceeded as far as it can without further co-operation and assistance from its patrons. A complete survey of its natural gas situation has been made, including estimates of probable supply available within the scope of present operations, the feasibility of attempting to procure gas if possible from beyond present operating areas, and such alternate plans as have suggested themselves in connection therewith. These will all be outlined to you in newspaper articles which will follow, and we trust that you will read carefully our presentation of facts, because in no other way can we put them before you. When you have been made acquainted with conditions surrounding natural gas activities today, you and we will have to agree upon what plan is best for adoption to meet respective needs.

THE LOGAN GAS COMPANY

258 East Gay Street, Columbus, Ohio

N. B.—This is one of a series of articles concerning natural gas conditions as they particularly concern our patrons and ourselves.

We invite inquiries and correspondence from any of our consumers who desire more definite information on any feature of these discussions.

Both Overdone

"I care not who makes the laws of the nation, if I may but write its songs," said Fletcher, the philosopher. The consensus of opinion is that there has been too much activity in both lines.—Detroit News.

KIWANIANS

Will Make Effort to Get Voters Out in Fall Election.

A vigorous campaign to get all voters to vote in the fall elections is being planned by all the Kiwanis clubs of the country in accordance with policies which have been adopted by Kiwanis International at a meeting just concluded in Chicago.

In 1896, 80 per cent of all those eligible voted in the presidential elections; in 1900, 73 per cent voted; in 1908 the percentage decreased to 66 per cent; in 1912 there was a further decrease to 62 per cent and in 1920 less than 50 per cent of the voters exercised their franchise.

"This campaign," said Victor M. Johnson, newly elected president of Kiwanis International, "will be to urge all citizens to express the desires of the entire people, and not less than half of them. A continuation of the present low voting percentage would certainly lead to the impracticabilities and danger of radical minority. The work of the clubs will be part of our general campaign to promote an intelligent, aggressive and serviceable citizenship."

"There is no partisanship in this campaign, and no fund is being raised to carry it on." Members of each of the 1250 Kiwanis clubs will work in their communities, purely on a basis of developing this much needed citizenship.

SET YOUR TABLE CORRECTLY.

The girls of the Logan Elm Food club will give a demonstration on the correct form of table setting at the grange meeting to be held at the Pickaway township school building, Tuesday evening, August 5.

CHILDREN'S STORY HOUR.

Mrs. E. A. Allen, of South Court street, left today for the Lancaster camp ground where she has charge of the Children's Story Hour each afternoon this week.

MALONE FAMILY REUNION.

The Malone family reunion will be held at the grove on the John R. Van-Meter farm, Jackson township, Sunday, August 17. 7augw2.

—John S. Neff, local cream agent for the London creamery is ill at his home on East Union street.

IT PAYS TO ADVERTISE

HABIT CLINICS FOR CHILDREN A SUCCESS

Department of Labor Reports Favorable Results in Treatment of Abnormal Cases.

Washington. — "Habit clinics" for young children, the latest development in the child hygiene field, are described in a report just issued by the children's bureau of the Department of Labor.

The habit clinic treats children displaying temper tantrums or other bad habits as "patients" and diagnoses and treats the bad habit on a scientific basis. By eliminating the cause of the bad habit the clinic helps the child to make a normal adjustment to his surroundings and develop into a well-rounded personality.

Dr. D. A. Thom, Boston, director of the habit clinics of the Community Health association of that city, is the author of the report issued by the children's bureau. He states that the first habit clinic, organized in 1921, was so successful there now are eight clinics, three under the association and five under the division of mental hygiene of the Massachusetts department of mental diseases. Doctor Thom also is director of this division.

Habits most frequently treated by the clinics relate to feeding problems, temper tantrums, pugnacity and shyness, problems relating to sex life, enuresis, destructiveness, delinquency and acute personality changes.

Children who just "won't eat" the wholesome food they need; children who respond to every attempt at discipline with a screaming, kicking attack of temper; children who are either too shy or too "bossy" to mingle happily with schoolmates and playmates, or even brothers and sisters; children who, without apparent reason, begin to lie or steal, and many others, come or are brought to the clinics to get their difficulties straightened out.

Prior to Doctor Thom's report this year, 160 cases were registered at the clinics, 130 of which were studied thoroughly. In only 19 cases, Doctor Thom reports, were results discouraging and no evidence of improvement shown. Of these discouraging cases, 12 came from families which gave no co-operation. Only seven children whose families co-operated failed to improve.

Lincoln, Famous Spy,
Turns Up as Fascist

Ignatius T. Trebitsch-Lincoln, probably the most amazing international character brought to public attention during the war and after, has again appeared, this time in connection with the Italian imbroglio surrounding the murder of Giacomo Matteotti. Dispatches from the Italian capital tell of the identification of "Otto Chirzel," one of those under arrest for the slaying, as Lincoln, Hungarian Jew and Anglican curate, British M. P. and German spy, and likewise one-time tenant of the Raymond street jail in Brooklyn. Lincoln's career takes in episodes from all over the world. It is said he once wrote letters which caused distraction among the police heads of Brooklyn's force.

Thirtieth Infantry Ranks High in Marksmanship

San Francisco, Cal.—The Thirtieth infantry, stationed here, is establishing the reputation of being the best regiment of marksmen in the army. It is said at Western division headquarters.

Recently 46 men of the regiment went to the rifle range at Fort Barry with automatic rifles. The qualification of "expert rifleman," the highest grade awarded for marksmanship, was given to 44 and the other two won the rank of "sharpshooter," the next highest grade.

The automatic rifle, a light, air-cooled machine gun, is carried and fired like an ordinary rifle and requires expert handling.

Out of 90 automatic gunners of the regiment 85 have qualified as expert riflemen this year and the other 5 rank as sharpshooters.

A \$10,000 Soupbone

Muskegon, Mich.—A \$10,000 soupbone threatened to be an issue in circuit court here. Mrs. Mary Kurzdell, through her attorneys, has filed suit for that amount against the city of Muskegon Heights, alleging that the officers arrested her and took a package containing the soupbone from her, believing it to be liquor and that she was released when the officers discovered their mistake.

EXPECTED TO SPEAK

Davis May Attend the Ohio Democratic Convention.

Washington, Aug. 4.—John W. Davis, Democratic candidate for the presidency, may attend the Democratic state convention at Columbus and deliver there one of the national addresses of his campaign. Clem Shaver, Democratic national chairman, said there is a possibility Mr. Davis may choose Columbus as the place of delivering a set address he has in mind to deliver after his formal notification and his speech of acceptance. George White of Ohio has been in New York during the last few days and it is understood he has strongly urged Mr. Davis to attend the Ohio state convention and make that the occasion of the speech which he expects to make directly to the farmers of the nation.

All summer stock will go below cost including Gage models. Get your hat now.

Griffon Cool Suits---

\$22.50

This offer is a sample of what this store is doing to make August 1924 a bigger month than August 1923.

It is made to make the men who have decided to wait decide to wade in!

Every suit worth \$5 to \$10 more by actual and truthful facts.

Every suit a 1924 model in style and a living model of saving to its purchaser.

Sizes 36 to 44

The woolen world's most recent shades

If you are interested it would be well for you to say so this week while our selections are strongest.

Special sale of about 100 good all wool light suits formerly sold at \$25 to \$35, most all sizes in the lot. Your size may be gone soon. You should come early.
